App feature set and flows

The Common Community — Lambeth neighbourhood app

Document: App_Feature_Set_and_Flows_v1.0 Date: 1 October 2026 Folder: The Common / 02_Product_and_RD Company: The Common Community Status: Stage 0 review pack Related: Publishing_Workflow_v1.0, Publishing_and_Vercel_Deployment_v1.0, Development_Brief_v1.0

How to review

This is the feature and flow pack for the bot team. Review the published address once David has pressed Publish. Until then the app exists only in the private chat preview.

Please review layout, navigation, copy, and whether a resident can complete each flow below. Bookings, reports, messages, and CV uploads stay on the device. They are not delivered to a business, the police, the fire service, or the council. Payments are not connected.

Demo businesses include Be U Studio, Buddy's Deli, Buddy's Coffee Shop, The Brew and Barrel, and The Common Restaurant. Demo businesses, events, and marketplace listings are allocated to the super user dvmorris.dm@gmail.com for the preview.

Product

A mobile-first neighbourhood app for Lambeth. Header reads Lambeth on the first line and Common Community on the second. The logo sits top left. Top right is Log in when signed out, and a profile icon when signed in. There are no separate login or register buttons on each page.

Bottom navigation: News, Events, Business, Marketplace, Services.

Area chips follow the Lambeth neighbourhoods from the London research. If location is allowed, the current area is placed first.

Roles

Role	**What they can do in this preview**
Guest	View news, events, businesses, listings, and services. Use phone, email, website, and directions. Cannot complete forms or create posts.

Role	What they can do in this preview
Member of the public	Sign in, favourite, follow, book, message, report, and submit a CV.
Business owner	After an approved business, open the business tools and dashboard. Submit events for admin approval. Create marketplace listings.
Event organiser	Register as this type. Events are still created from an approved business profile, not by a private user.
News author	Register as a reporter. Public news in this preview is seeded, not posted from a public form.
Council member or partner	Register. Council desk appears only if a super user grants that duty.
Super user	dvmorris.dm@gmail.com. Can open every desk. Demo content is owned by this account.

Staff desks are desktop-first and only appear for granted duties. The business portal appears only after a business profile is approved.

Feature set

News

- Neighbourhood news list, with the local area first when location is known.
- Cards open to a full article with a faded header image and at least a short body.
- Heart and share icons only on the opened article, not on the list.
- Share uses the device share sheet, or copies the link.

Events

- At least one event per neighbourhood, including made-up samples where needed.
- Filters: Food, Music, Arts, Community, Family, Markets.
- Opened event page: time, date, place, detail, website, ticket link, map, directions, and contact.

- Free-place reservation with a code and QR ticket. Written code is hidden until Show manual code. QR and code are covered if a screenshot is attempted.
- Paid tickets link out. They are not sold in the app.
- Create event is not on the public list. A registered business submits an event from its profile or dashboard. Admin approval is required before it is public.
- Our Events on a business page lists events that business created.

Businesses

- Directory by neighbourhood, with cover images.
- Opened page: description, promotions with a price and image, menu or services or products depending on the trade, ratings, map, directions, phone, email, website.
- Menu, services, or products change with the selection. Prices are shown, including sample prices.
- Service businesses can take a booking request. Hospitality can take a table request. Be U Studio requires the consultation and consent form before the request is held.
- Chat with the store is a note to that business, held on the phone.
- Follow, rate, and report require sign-in.
- Our Events and Other link to that business's events and marketplace listings.
- Opening hours and address sit under Other.

Marketplace

- Fifteen categories: Cars and vehicles, Home and garden, Electronics, Fashion and clothing, Baby and kids, Sports and leisure, Jobs and services, Pets and animals, Business and commercial, Property, Entertainment and events, Collectibles and antiques, Free and giveaways, Food and drink, Other.
- Filters are dropdowns: category, subcategory, listing type, condition, price.
- Listing types: For sale, Wanted, Free, Swap, Service, Rental.
- Condition: New, Like new, Good, Used, For parts.
- Price bands: Free, Under £10, £10–£50, £50–£100, £100–£500, £500+.
- Each listing shows price, how long ago it was published, and image or video where present.
- Opened listing: message the business, and for jobs a CV upload of Word or PDF.
- Create listing sits with the marketplace header on the right, and only when signed in.
- Sample listings include a Be U Studio stylist vacancy and bakery equipment from Buddy's Deli, linked from each business Other button.

Services

- Council and emergency services sit at the top: police incident report, fire assistance, hospital call for help (999), and NHS 111.
- Find a service filter includes police, fire, hospitals, clinics, dentists, schools, taxi, bus, and train.

- Each service expands with address, map, directions, and contact.
- Closest police station and fire station are listed per area.
- Request a taxi is an in-app form with a road-time estimate. Nothing is booked with a cab firm.
- Bus and train times are shown in the app from live departure boards, not only as an external link.
- Police and fire reports accept a description, camera photo or video, upload, and anonymous or named. Send report does not leave the phone.

Account

- My Profile, centred.
- Sign up is dynamic by type: member of the public, business, council, event organiser, social club, news author, council partner.
- Log in, and Register if the email is not recognised.
- Signed-out users see Log in in the header only.
- Signed-in snapshot: account types held, home area, following, favourites, reservations.
- Your area links to my businesses, my events, and my marketplace listings only when that person has them.
- Log out sits at the bottom of the profile page, not on every page.
- Favourites only. Save was removed because favourite covers it.

Desks

- Staff sign-in is separate from the resident account.
- Admin desk: review businesses, events, listings, and reports.
- Business desk: owner tools after approval.
- Council desk: partner view when granted.
- Super user can open all levels.

Flows

1. Guest browses

Open News. Change area. Open an article. Open Events, filter, open an event. Open a business, read the menu or services, open the map, call or email. Open Marketplace, filter, open a listing. Open Services, expand a station. Guest must not be able to send a form.

2. Sign in and favourite

Header Log in. If the email is unknown, Register appears. After sign-in the header becomes the profile icon. Open an article, event, business, or listing and tap the heart. Confirm it appears under Favourites on My Profile.

3. Book or reserve

Signed in, choose a service or menu item, then Book a service or Reserve a table. Be U Studio must complete the consent form first. A code is held on the phone. For a free event, reserve a place and open the QR ticket. Confirm the written code is hidden until requested.

4. Contact a business

Signed in, send a store message or a listing message. For the stylist vacancy, upload a Word or PDF CV. Confirm a guest cannot submit these.

5. Business creates

Sign in as the super user. Open My businesses, then a business page. Other should list that business's marketplace items. Our Events should list its events. Create listing and submit event are available from the owner tools, not from the public events list. New events wait for admin approval.

6. Emergency and travel

Services: police and fire cards, Send report, camera or upload, anonymous choice. Hospital card calls 999. Taxi request holds a note and a road time. Bus and train cards show departures in the app.

7. Staff review

Open the staff desk, sign in as super user, and confirm admin can see pending items and reports. Confirm a resident without a grant does not see the desks.

Out of scope for this review

- Stripe or any payment
- Delivery of reports to the police, fire service, or council
- Delivery of messages or CVs to a real inbox
- Live booking confirmation by the business
- News written and published by a reporter from the public app
- Screenshot blocking is a deterrent only. A determined capture can still succeed.

Review checklist

- Header, logo, and area chips match the Lambeth brief.
- Five tabs open the right lists, with no circular dead ends.
- Guest can view and contact, and cannot post or complete a form.
- Detail pages have heart and share. Lists do not.

- Business shelf label is Menu, Services, or Products as appropriate.
- Events and listings link back to the owning business.
- Service cards expand with map and contact.
- Profile shows favourites, not a separate saved list, and log out is at the bottom.
